RESHAPE THE WAY YOU SEE DATA

ABOUT (NO)US

Dear data consumer,

The next dimension of data visualization is here.

We have been developing the **Power BI** and **Tableau** dashboards we wish we had when we were analyzing the old fashioned and messy reports available in the market.
Nous is a young startup with a bold mission that wants to reshape the way data is seen.
It is difficult to develop and use complex reports with a low user experience, lack of insights and crowded workspace.

For Nous, each client is a project, a design and an experience.
We know data by itself is very complicated to demystify, thus a dashboard, should be simple, user-oriented and easy to visualize. Therefore, on each mission, we allocate a UX/UI expert to enhance the final solution and leverage its quality.
This agile and lean methodology, give us the opportunity to deliver the final product faster, and less bureaucratic, focusing on the product´s quality and client´s full satisfaction.

We are data. We are visualization, and you?

On behalf of Nous Team,
A data lover ♥

DISCOVER

BI MAINTENANCE:

We develop you any type of BI solution: Dashboards, Reports, Infographics, GeoMapping, you name it.

BI TEMPLATES:

From our portfolio, every week, we launch 3 new templates to add on our BI market-place. Visit us, and let us know your favorite BI templates. Buy and use it!

BI SERVICE:

Nous help you to keep your BI solutions running as good as on the first delivery day. Avoid last minute surprises and partner up with us.

BI CUSTOM VISUALS :

We can help you developing custom visuals, available or not in Power BI, to enhance your dashboard´s design and its insights.

RESHAPE THE WAY YOU SEE DATA

WHITE BACKGROUND DASHBOARD

Simple, clean and business oriented. Our white dashboards, were our first core business when we started. Classic and sharp design, that conquers every data lover at first sight. It's always difficult to find the right style and color pallet, but with Nous, everything gets clearer and easier.

DARK BACKGROUND DASHBOARD

Are you a fan of dark background dashboards?
Check out some of our most recent solutions developed on a darker screen. We know some users have difficulty to enjoy a white dashboard for a long period of time, for that reason, we adapted every dashboard developed in a darker mode.

IMAGE BACKGROUND DASHBOARD

In a more complex side, image background is becoming more and more trendy in the data visualization industry.
Although is very difficult to implement, when you have a good design combined with a great image background, you can have this magnific result. Interested? Reach out and find out more!

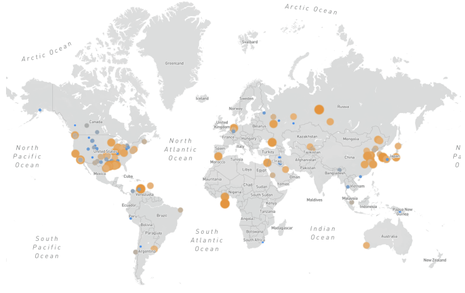
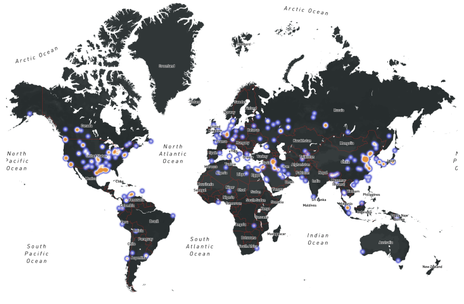
GEOMAPPING

We have experience dealing with Geo data, and developing customized maps according to the business need.
At Nous, we are developing Business Intelligence solutions to help you achieve insightful and high-end designed mapping tools.
We have experience with traffic data, points-of-interest, heatmap, bubble map, and many other types of spatial data visualization. Take a look on some of our examples that we can build to you.



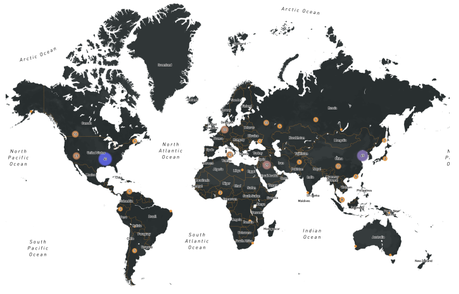
BUBBLE MAP

When to use:
Show geographic coordinates (longitude and latitude), list of regions with attributed values and known boundary to display quantitative information on a map.



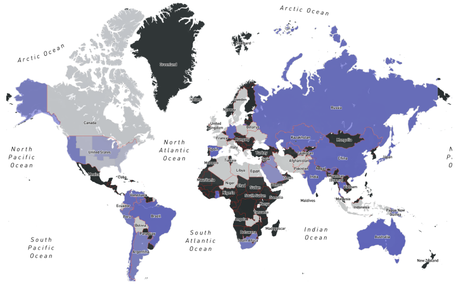
HEAT MAP

When to use:
Show geographic coordinates (longitude and latitude)
Find patterns between data clusters to show spatial patterns and relationships.



CLUSTER MAP

When to use:
Map leaner and cleaner, avoids overcrowding, helps improving the perceived performance of the map group pinpoints on the map based on some factors



CLOROPETH MAP

When to use:
When working with socioeconomic data.
When defined regions are important.
To get an overview of the distribution across the geographic locations.
